

ICP Ceramic Solutions

Investment casters rely on Industrial Ceramic Products as one of the most dependable sources of quality ceramic consumables. ICP has over 85 years of experience in helping foundries make better castings by manufacturing a wide range of ceramic products used in high-temperature applications.

ICP production capabilities, optimized processing, and inventory/warehousing options have become essential to clients looking for rapid turnarounds.

Materials include Fused Silica, Mullite, Alumina, & Custom Compositions

*ICP's Main Manufacturing Facility and Technical Center
are located on a 13-acre campus in Marysville, Ohio.*

*Compression Molding, Injection Molding, Extrusion and Proprietary
Forming processes are utilized to manufacture over 3,000 different
ceramic part numbers.*
